

PUBLIC NOTICE

The U.S. Army Corps of Engineers (St. Paul District) has previously posted notice of the application for a letter of permission (LOP-10R) for the New Odanah/Diaperville Community Water System Improvement Project; this notice was posted in 2015.

In accordance with Section 401 of the Clean Water Act (CWA), the Bad River Band of Lake Superior Tribe of Chippewa Indians (Bad River Tribe) examined the application of the LOP-10R and evaluated if there was reasonable assurance—with conditions attached—that the activities associated with this individual permit will be consistent with relevant water quality considerations. The Bad River Tribe has previously posted notice of the CWA Section 401 certification of this federal permit in 2015.

The New Odanah/Diaperville Community Water System Improvement Project has been modified in a manner that requires the Bad River Tribe to re-examine the application of the LOP-10R and re-evaluate if there is reasonable assurance – with conditions attached – that the activities associated with this individual permit will be consistent with relevant water quality considerations.

The Tribe seeks comments on its CWA Section 401 Certification decision associated with the New Odanah/Diaperville Community Water System Improvement Project. Written comments can be sent via email or post office to:

Naomi Tillison
